9.	Harvesting scene with Shire Horses	8"	60"

## LEEDS

Welcome to Leeds, a City with a long and venerable history, whose growth during the Industrial Revolution of the 19th Century led it to become the commercial and industrial centre it is today.

A City of striking buildings blending the old with the new, from the Civic Hall fronted by formal gardens, the Town Hall built by Cuthbert Broderick in 1853, to modern attractive precincts with shops to cater for every taste.

However, only a mile or so outside the City Centre, one finds oneself deep in the countryside surrounded by splendid gardens and country houses, delightful Yorkshire villages, where one can still catch glimpses of a bygone age.
